GRAND KHAAN PREMIUM VODKA

Original Mongolian Vodka

A small batch premium vodka. Grand Khaan is distilled exclusively from the finest organic summer wheat, grown on the Mongolian steppes, where the grain is locally harvested and fermented at a height of 4,000 feet above sea level. The water used in the production of this premium vodka originates from crystal clear springs that begin as winter snowfall in the native mountains of Chinggis Khaan. This vodka is triple distilled and filtered six times through quartz sand, white stone and charcoal from silver birch for optimal flavour and smoothness
