SELVA GIN

Colombian London Dry Gin

Gin Selva is the first London dry gin produced in Colombia! • Produced in small batches and distilled in Cartagena. • Made with Bulgarian juniper berries and a mix of native fruits, herbs, and spices, including Corozo or small palm fruit, raw fermented cacao and a hybrid citrus fruit called limon Mandarino. • Selva Gin is a collaboration between two bartenders and a Colombian chef in partnership with Turicum Distillery in Zurich, Switzerland. • The bottle is crafted from 100% recycled wine glass, giving each bottle a unique colour.
