

DICTADOR ORLINSKI ORANGE & PINK

Game Changer Series | Art Rum

Dictador Game Changer Orlinski Orange & Pink is a art-rum in a warm solar duo — orange evoking energy and creativity, pink adding tenderness and daring. The two-tone Orlinski bottle is topped with his sculpted Kong-head stopper. Inside: the classic Dictador blend, distilled from virgin cane honey and tropically aged in American oak casks. 40% volume. Numbered limited edition. AGEING: tropical maturation in American oak casks — the cane honey distillate and warm climate develop the signature Dictador profile: maple syrup, dark caramel, clove, tobacco and a gentle oak structure. Each bottle individually numbered. 40% volume. COCKTAIL SUGGESTION: for a bottle that already makes a statement, the Rum Old Fashioned is the right serve — 5 cl Game Changer, 1 bar spoon cane sugar syrup, 2 dashes Angostura, large ice cube, orange zest over the rim. The cane honey base is made for this format. Also compelling neat at room temperature in a Glencairn — the caramel and honey sweetness makes a quiet, satisfying argument.

Tasting notes

Color

Amber gold hue, elevated by a two-tone orange and pink Dictador bottle topped with Orlinski's sculpted Kong-head stopper.

Aroma

Rich nose: maple syrup, dark caramel and fresh orange peel open onto notes of clove, tobacco and roasted cocoa. The patinated, round Dictador signature asserts itself immediately.

Taste

Suave, enveloping palate: caramel, honey, raisins and gentle spice. American oak lends an elegant woody structure without overpowering the sweetness of the cane honey.

Finish

Medium, warming finish of candied orange peel, coffee and toasted vanilla.

DICTADOR The Game Changer collection is born of the encounter between Dictador and French contemporary artist Richard Orlinski, the world's best-selling living artist in his segment since 2015. Known for his faceted style and pop colours, Orlinski gives each edition a unique Dictador bottle livery topped by a sculpted 'Kong' head stopper — a direct reference to his most iconic work. Behind the artistic shell sits the rum itself: a Dictador blend distilled in Cartagena, Colombia, from virgin cane honey and aged under tropical climate in American oak barrels. Every colourway is a numbered limited edition, designed to be both collected and drunk.
