

BELUGA ST. MORITZ

Noble Winter Series

Beluga St. Moritz Edition was created in collaboration with the Swiss alpine resort; this is the first bottling in the new Beluga Noble Winter series. This vodka is distilled using the finest organic grain from the Baltic States and pure artesian water from wells beneath Latvian pine forests. Filtered twice through quartz sand, three times through silver-enriched charcoal filters and rested for 60 days to allow the smooth, rich flavour to develop. Enjoy it neat or as a base for cocktails. Beluga Vodka goes well with caviar, tartar and cold meats

Tasting notes
